DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with the attorney for applicant, Michael A. Dryja (Reg. No. 39,662) on June 21, 2004.

The application has been amended as follows:

Canceled claims 15-19.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance:

The prior art, individually or in combination, does not teach a method for controlling sequencing of data writes - from peripheral devices in a multiprocessor computer system - by tracking a sequence order of the first data write relative to a second data write, processing second write data associated with the second data write substantially simultaneously with processing of first write data associated with the first data write, the processing of the first write data and the second write data using one or more of a plurality of memory systems, and outputting the processed first write data,

Art Unit: 2182

and then outputting the processed second write data only upon completion of the first data write.

The prior art, individually or in combination, does not teach a computer system having first and second interconnected groups - each group having one or more processors, a peripheral device associated with one of the groups and capable of initiating first and second data writes producing first and second write data - respectively, a sequencer responsive to the first and the second write data and capable of tracking overlapping of the first and the second write data, and storage for the first and second write data - wherein the storage for the second write data is capable of accepting the second write data before completion of the first data write, and wherein the output for the second write data is capable of outputting the second write data only after completion of the first data write.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
